## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mohan (U. S. PAT. 5,986,479).

In claims 1-3, Mohan teaches all claimed features in Fig. 7, a current source circuit ( $I_{BG}$ ), comprising: a component (M7) determining a magnitude (a level of current flow) of a current emitted from the current source circuit; and a control apparatus (M8-M14) connected to and controlling said component (M7), a control process being carried out in dependence on conditions prevailing in a unit supplied (M1-M5) with the current from the current source circuit; wherein said component is a transistor (M7); and wherein said control apparatus (M8-M14) contains a current replication path (M11) in which a given current (a current flows through M11) is caused to flow corresponding to the current ( $I_{BG}$ ), a specific multiple of the current, or a specific fraction of the current fed to the unit supplied with the current from the current source circuit.

3. Claims 4-9 appear to comprise allowable subject matters.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Claims 1-3 are rejected as being anticipated by Mohan, as discussed above.
